Subject: Black Lake
To Whom It May Concern:

I oppose the use of all the chemicals listed in the recent Public Notice to control aquatic plants and algae in Black Lake. I use the old fashioned methods of hand removing the yellow flag iris on my property, and I hand harvest all the Eurasian Water-Milfoil I see near the shoreline. I maintain organic practices on my lakefront property. I also maintain my two bee hives and do **NOT** want these chemicals used Black Lake. The bees drink on the shoreline, and their application may very well destroy my hives. Colony collapse is a serious environmental concern.

Outlawing speed boats would be a much more desired means of controlling invasive aquatic plants! Please do not approve the use of these chemicals! I'd appreciate any updates on the decisions made. For the record know that I at the lease want my property line to be exempt from direct application on my immediate shoreline.

thank you,
Patty May
