

BLACK LAKE SPECIAL DISTRICT

Integrated Aquatic Vegetation Management Plan

Community Workshop #1 · Understanding Black Lake

Date: June 13, 2026

Time: 12:30 – 2:30 PM

Location: Black Lake Bible Camp & Retreat Center · 6521 Fairview Rd SW, Olympia, WA 98512

AGENDA

Welcome & Introductions

Opening remarks; project team introductions; housekeeping

Project Overview

Purpose of the IAVMP

Problem Statement — Black Lake Vegetation History

Historical aquatic plant data and past management

Public Involvement

Role of community input and how feedback will be used throughout the process

Water Body & Watershed Features

Black Lake's watershed, hydrology, water quality and key physical characteristics. We will also discuss lake sediments, nutrients, and shoreline conditions.

Break

Beneficial Use Areas

How the lake is used (recreation, boating, wake boarding, habitat, aesthetics) and why it matters for lake management

Aquatic Plant Mapping

Overview of plant survey methods and what to expect from the upcoming field survey

Management Goals

Goal-setting criteria; facilitated community discussion on priorities for Black Lake

Q&A and Next Steps

Open questions and how to stay involved between workshops

Adjourn

Community Survey

Scan the QR code to complete the community priorities survey. Your responses directly inform the IAVMP development.
